

ZÜBLIN Timber

ZÜBLIN
WORK ON PROGRESS

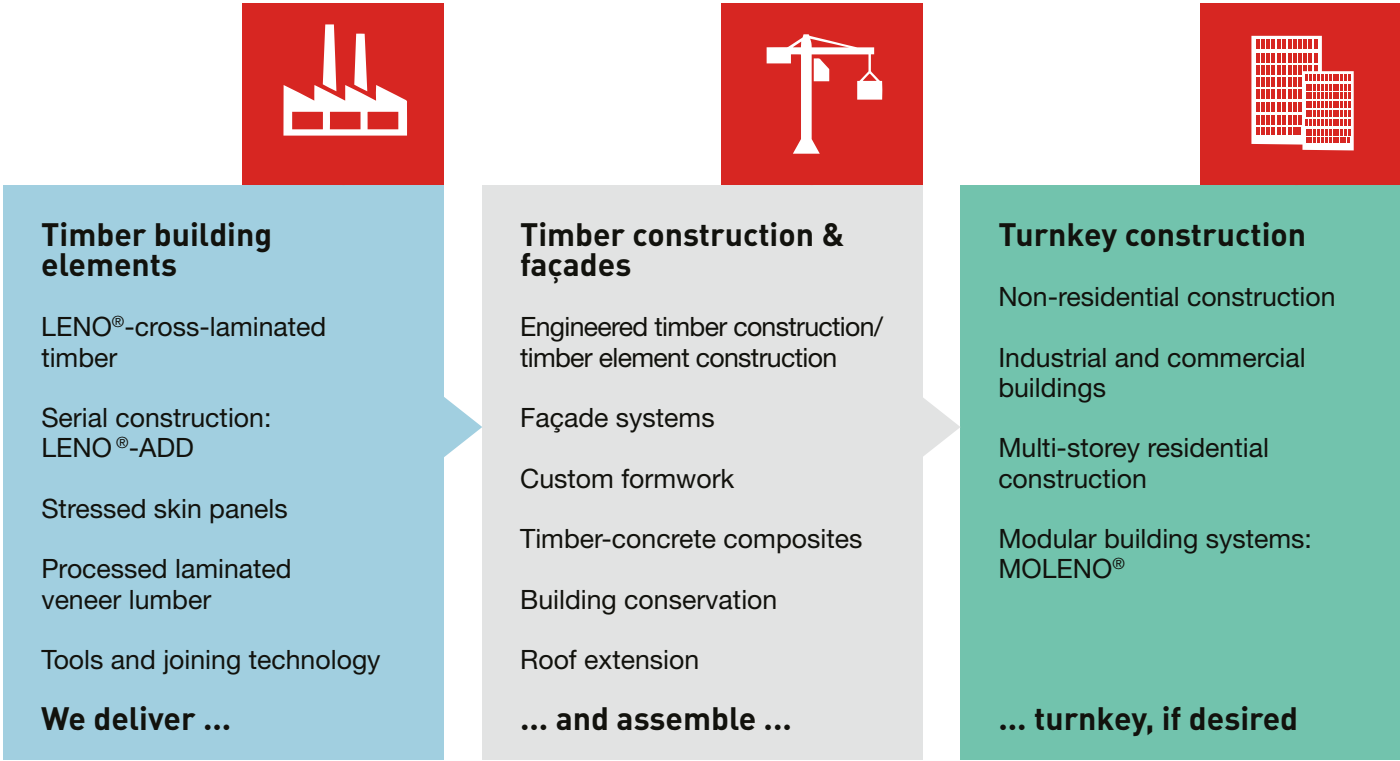

We develop, design, produce and build

Your timber construction expert

ZÜBLIN Timber stands for ambitious and pioneering solutions in all areas of timber construction. We are a single-source provider for the development, production, delivery and execution of high-quality timber construction systems – from the supply of structural parts to complex timber engineering and façade construction to turnkey project execution. We work hand in hand with our clients to develop efficient solutions and a sustainable quality of life.

What services do you need for your timber construction project?

We offer a wide range of services along the entire value chain in timber construction.

With our strong expertise, even more is possible!

Timber construction elements

Simplifying your construction project

Our ideas, innovative products and system solutions will help guarantee the success of your timber construction project.

We understand the construction and design challenges of timber construction projects of all sizes. This translates into economic benefits for you!

Our services for carpentries and timber construction companies:

We manufacture and supply:

- LENO® cross-laminated timber
- Serial construction: LENO®-ADD
- Stressed skin panels
- Processed laminated veneer lumber
- Tools and joining technology

We get your components ready to go.

We produce according to your specifications. You determine the degree of prefabrication yourself. **No matter where, we are your go-to system supplier at your side.**

Turnkey construction

Our references confirm our reliability.

Together with the ZÜBLIN Group's expertise in turnkey construction, ZÜBLIN Timber offers the full range of services from the development, production and delivery of high-performance building systems to the realisation of turnkey timber construction projects.

We see to it that your visions take shape – from new buildings to extensions to re-build, conversion and refurbishment.

- Services:**
- Consulting for your project development
 - Financing and PPP models
 - Execution under TEAMCONCEPT® partnering scheme
 - Realisation of your timber construction project
- In the fields of:**
- Non-residential construction
 - Industrial and commercial buildings
 - Multi-storey residential construction
 - Modular building systems: MOLENO®

Honest, constructive collaboration

With innovative solutions, we open up new possibilities and markets for structural timber engineering. **Our expertise as a general contractor offers you total security – both in terms of cost control as well as schedule certainty.**

Work On Progress

Few industries have a greater responsibility to find solutions for climate-neutral, socially responsible and environmentally friendly business practices than the construction industry. The construction industry must embrace real change – and every one of us has to contribute their share.

STRABAG and ZÜBLIN are reimagining the construction industry – and as a 100% subsidiary of ZÜBLIN, we at ZÜBLIN Timber are doing our part! Our common goal: becoming climate neutral by 2040.

We want to contribute to building a broad movement driven by the many steps and innovations, both big and small, that will be made in the years and decades to come.

**Using wood as a building material,
in combination with our sustainable building
systems, will help to achieve this change.
Of that we are certain!**
